

Severe budget cuts force tough choices on our schools, and "extra" curricular programs are always eliminated first. These programs are priceless, preparing our youth for real life adversity, actually living an experience, not from reading about someone else's.

Good Kids
=
Better Adults
=
Best Future

It is proven that vital life lessons are learned through participating in sports, performing arts and many other activities. These activities foster critical self-esteem, motivation, and leadership skills. They teach core values that often transcend into the classroom, and can transform youth in amazing ways. Just because you can't "grade" something, doesn't mean it doesn't count. In many cases, **these programs literally rescue "at-risk" kids.**

**We can't do this alone...
But we can "get by with a little
help from our friends."**

THANK YOU
from all of us at kindredSun!

Please visit us at kindredsun.com

No one should have to "Pay to Play."

The sun works. It's free. It's forever.

By 2020, it's estimated that 30,000 US schools **WILL NO LONGER OFFER** after-school, extracurricular or classroom programs.

The Problem: Billions of Dollars in School Budget Cuts, with no end in sight. **Until Now.**

We have the "fix" but need your donations to kick-start it.

Once our program is in your community it literally "Runs on the Sun."

How? First, we are not a Solar Company!

We work with them, and they are often your community sponsors as well. We are a "for-public benefit" Non-profit Foundation and Cause Marketing, or community advocacy company.

We redefine renewable energy benefits by adding mutual community financial benefits to the individual's utility bill savings, and we all receive the environmental benefits from clean, green renewable solar energy.

Working together we can create a powerful new source of guaranteed, on-going, non-taxed, passive clean energy based school funding that will:

1. Provide ongoing annual community school funding.
2. Pay for many after school and classroom programs.
3. Clean the environment using green solar energy.
4. Save families a lot of money on their utility bill.
5. Provide families a second income opportunity.

Sound good? It gets better.

Solar Energy That Saves You Money and Generates Revenue for Our Schools

*Revenue projections depends on community participation

With our Solar Power Pledge program and your community's support, we will save programs, and end "pay to play."

We "Serve and Protect": By creating a legal platform for a structured community "opt-in" entitlement. This revenue is based on the actual measured energy produced in your community every day, not shaky profit sharing promises.

How does your donation get spent? We use your donations to help subsidize our operating and every school pilot campaign's costs.

It's Incredible Value: With kindredSun™'s program donation literally regenerates its self in the form of long term community solar funding for your schools.

Your donation dollar never went further.

Ending "Pay to Play" Forever.
